1. Glossary of Terms & Abbreviations

Terms

Abbreviation	Description
THIQAH	Saudi business-verification authority providing ownership and registration details via the Wathiq Platform.

Abbreviations

Abbreviation	Description
UNN	Unified National Number
ID	National ID / Iqama
CR	Company Registration

2. Introduction

2.1. Project Overview

SIMAT 2.0 is a complete revamp of the current version SIMAT 1.0. This ABR document describes the requirements for the “Registration & Login” module components and addresses the major changes compared to the 1.0 version generally in terms of process flow and user journey.

2.2 Business Drivers

The requirement and the need for a complete revamp is centered on fulfilling the following objectives:

- More user-friendly & secure interface for businesses.
- Further resemblance to the new MOLIM application & SIMAH brand values.
- Facility to allow multiple users and manage multiple companies with a seamless user journey for the owners/managers to administer their respective companies.

3. Scope of Work

3.1 Scope Overview

Requested Service Already Exists?			
<input type="checkbox"/> Yes, as is	<input type="checkbox"/> Yes, need enhancement	<input type="checkbox"/> Yes, but not in the portal	<input checked="" type="checkbox"/> No, it is a new service
Affected SIMAT Services			
<input type="checkbox"/> Alert	<input type="checkbox"/> Appointment	<input type="checkbox"/> Credit Report	<input type="checkbox"/> Dispute
<input type="checkbox"/> Enquiry	<input type="checkbox"/> Finance	<input checked="" type="checkbox"/> User Management	<input type="checkbox"/> Narrative
<input type="checkbox"/> Packages	<input type="checkbox"/> Salary Certificate	<input type="checkbox"/> Others	
Affected System Integration

-------------------------------	------------------------------	--------------------------------------	--	--	---

3.2 In Scope

The scope of this requirement will cover all the SIMAT 2.0 user flows & journeys given below:

- Company & User Registration.
- NAFATH validation for registration & password reset.
- THIQAH authorization for owners/managers during registration.
- New User Registration for existing companies.
- Migration of SIMAT 1.0 companies & users to SIMAT 2.0 & the related onboarding activity.

3.3 Out of Scope

As this document describes the new initial registration and login process which is almost entirely different from the existing SIMAT 1.0 process, other aspects like dashboard, credit reports and SIMAT 2.0 features are out of scope here and will be covered in separate document module wise.

4. System User Roles

User Role	Role Description
SIMAT	
Registering User	A user who is registering for SIMAT 2.0.
Authorized User	A user registered through the THIQAH / AUTHORIZATION letter method.
Invited User	A user registered through invitation.
Active User	Authorized user / Invited user with active login & account not in blocked status for a company.
Inactive User	Authorized user / Invited user with access blocked to a specific company.
SIMAT 1.0 User	User who has SIMAT 1. 0 account.

5. Business Process

5.1. Current Process

Currently, SIMAT 1.0 user journey is a single login for a company with the CR number used to login and authenticated through OTP received to the registered mobile number.

Registration is also through THIQAH, validated through NAFATH. Registration can also be done through Authorized Letter process in SIMAT 1.0.

5.2. Proposed Process

SIMAT 2.0 shall have the registration process different from SIMAT 1.0 since each user profile can have multiple companies linked and a company itself can have multiple user access. The way users are registered in the new system is almost like that in SIMAT 1.0.

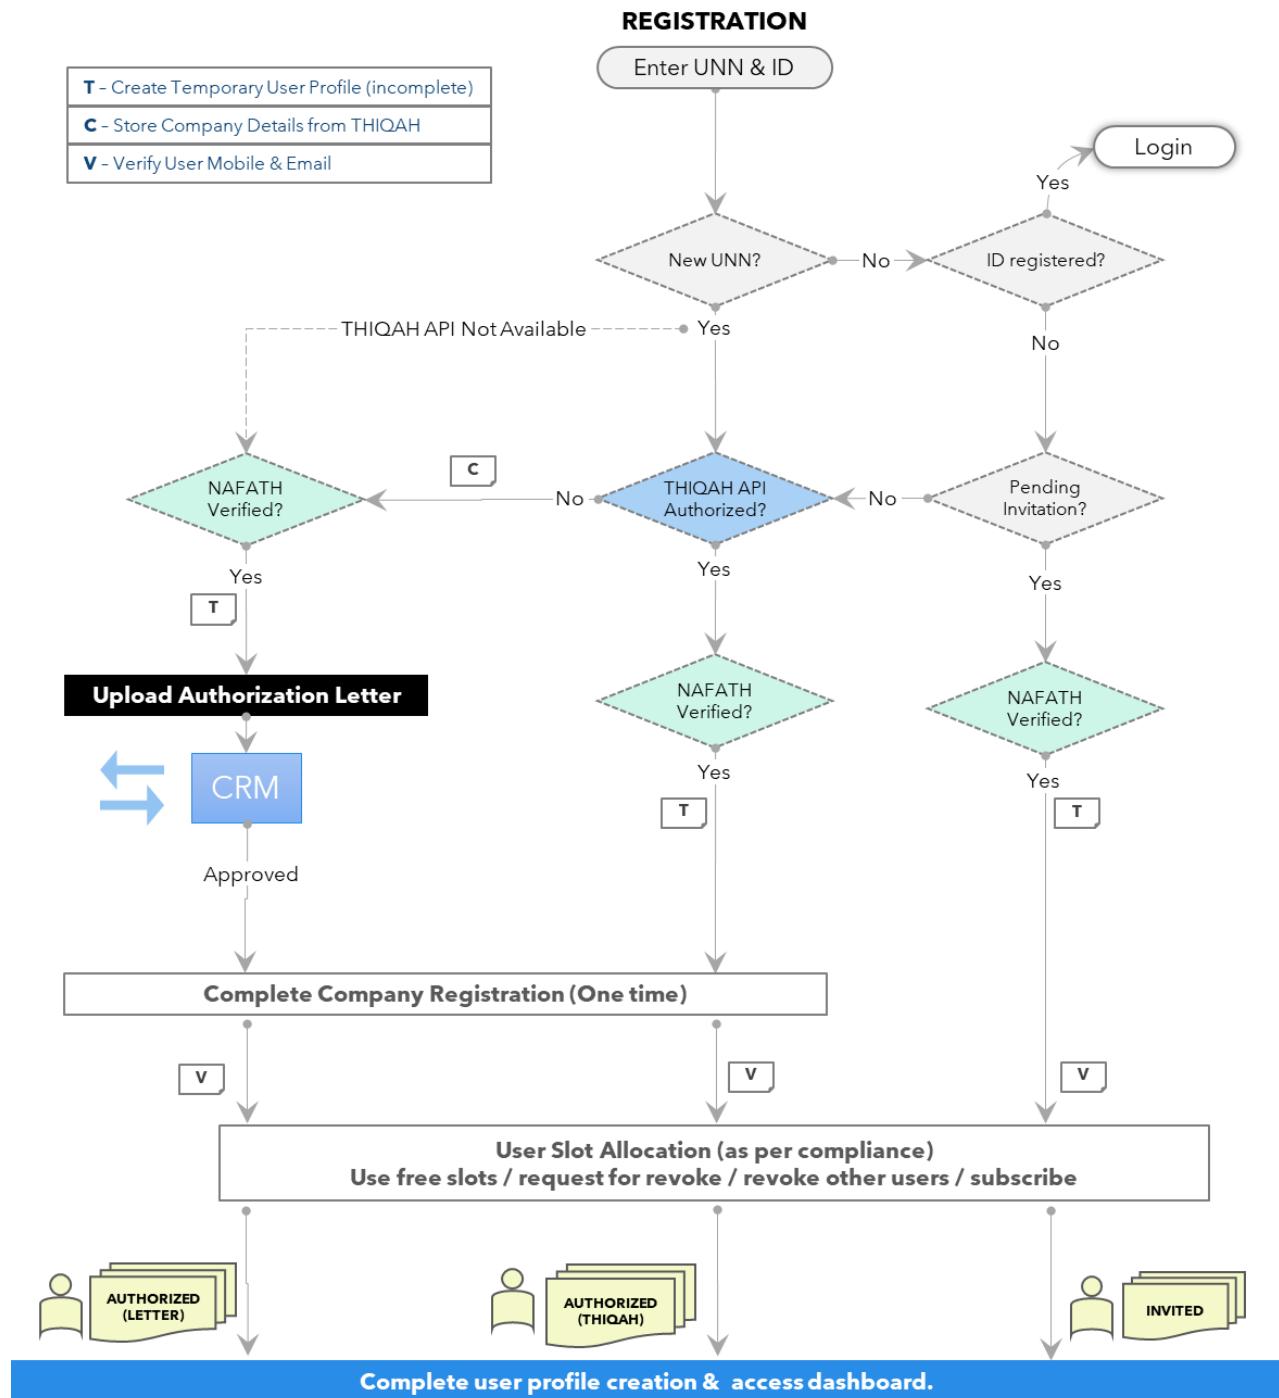

Classification: [Restricted](#)

Figure 1: High level flow for a new registration in SIMAT 2.0

User types

REGISTRATION METHOD	DESCRIPTION	USER ROLE
THIQAH API	Users registering & Authorized through THIQAH API.	AUTHORIZED
Authorization Letter	Users registering through Authorized Letter.	AUTHORIZED

Classification: [Restricted](#)

Invitation	Users registering through an invitation link received from Authorized users.	INVITED
------------	--	---------

Multi-user and Multi-company Organization.

SIMAT 2.0 shall support multi-user per company and multi-company per user. Below given is a conceptual representation.

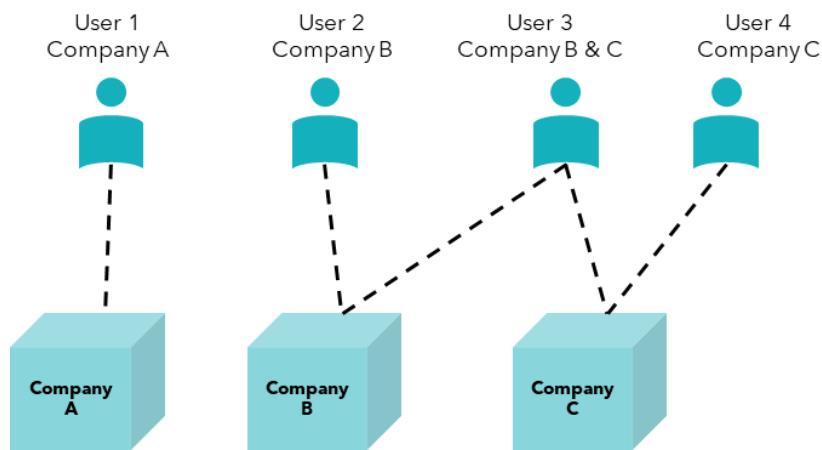

Figure 2: Multicompany and multi-user sample diagram.

Packages & user limit

The packages available in SIMAT 2.0 and their respective allocation of users allowed for the package are given below. Each of these are applicable to each company in the system. A free user means that the user is allocated and that is not connected to any subscription plans. The subscribed users on the other hand have a link to the subscription and depend upon the company's subscription. So for instance, in case a subscription gets expired for the company, the free users stay active but the subscribed users are blocked access for the company where the subscription is ended / terminated.

PACKAGE	FREE USERS	TOTAL USERS
Inactive	2 Free Users	2
Free Plan	2 Free Users	2
Monthly Plan	2 Free Users	2
Quarterly Plan	2 Free Users + 3 Subscribed Users	5
Yearly Plan	2 Free Users + 8 Subscribed Users	10

Classification: [Restricted](#)

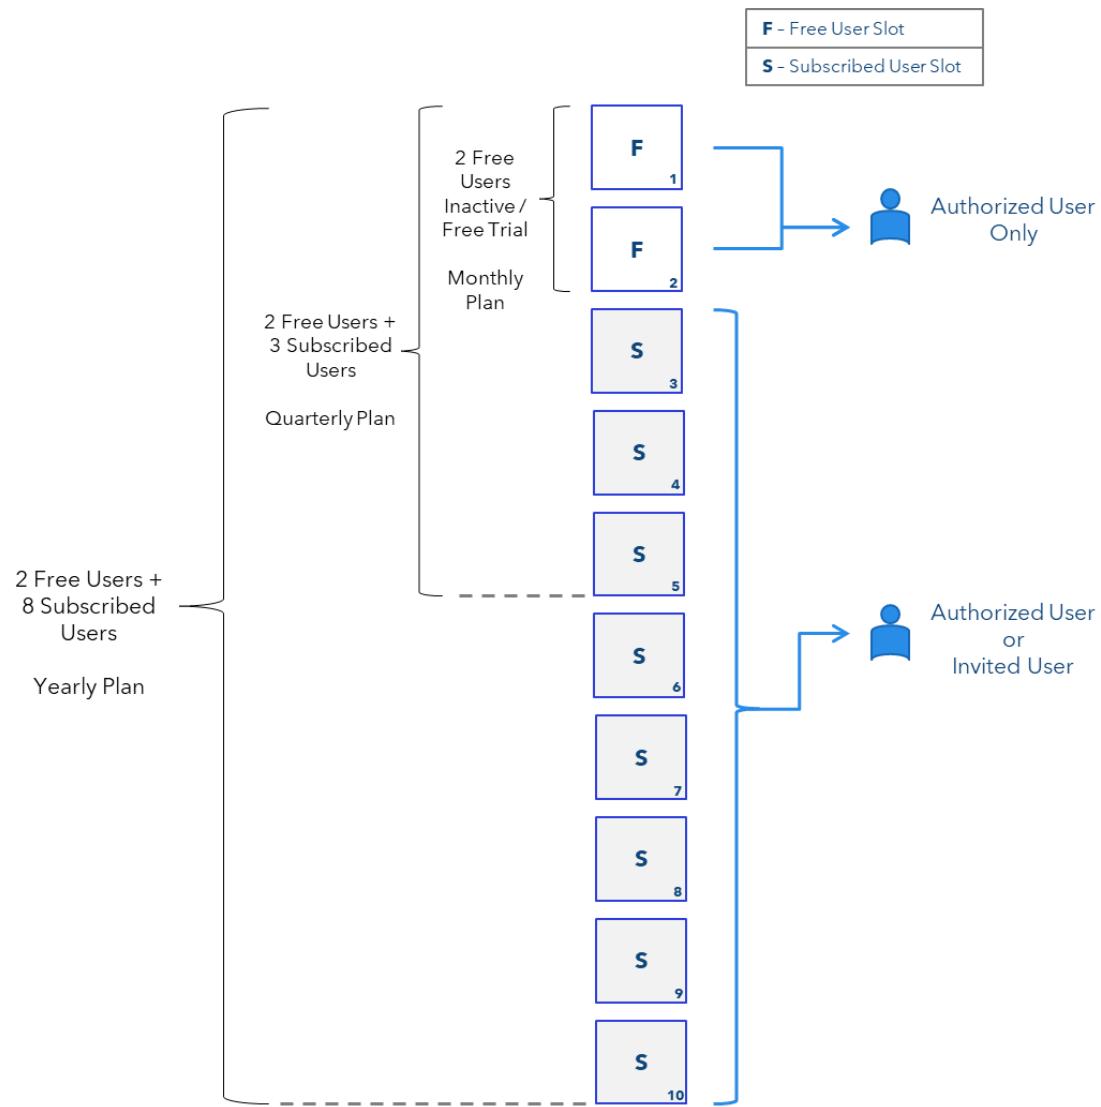

Figure 3: Users allocated per company for different subscription packages.

Migration

Migration from SIMAT 1.0 to SIMAT 2.0 is done by dividing the current company information. All companies shall be migrated from the SIMAT 1.0 database to the new version. For users, only the THIQAH registered users are migrated as they have Nafath verified ID number & corresponding mobile number. Below given is a representation of what important information that needs to be migrated.

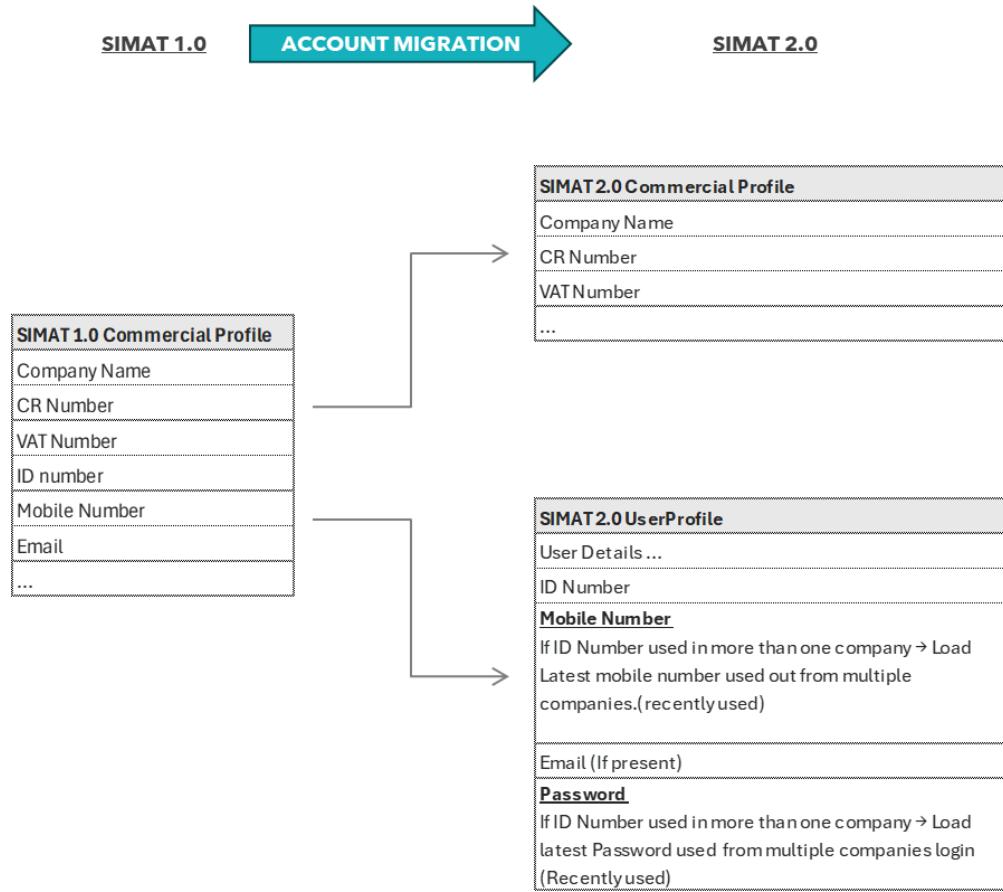

Classification: [Restricted](#)

Figure 4: Migration for companies and users.

6. Business Requirements

6.1. Functional Requirements

No.	System Features	Description
F01.	Registration	The registration process consists of company registration and user registration.
F02.	User Allocation	All scenarios covering user activation & allocation for a company as per the subscription plans & package compliance.
F03.	Login	Logging in and scenarios covering password reset.
F04.	Migration	Migration of SIMAT 1.0 companies to SIMAT 2.0.

Classification: [Restricted](#)

6.2. User Stories

Feature	ID	User Story	Acceptance Criteria																		
Registration	US01	<p>As a Registering User,</p> <p>I want to register my business with company's UNN and my ID to get authorized by THIQAH,</p> <p>So that I can proceed with <u>new business registration</u> in the SIMAT 2.0 system.</p>	<ul style="list-style-type: none"> - Registering user navigates to registration page and chooses "Register by UNN". - Registering-user enters the UNN & ID number on the registration page. - System verifies that UNN does not exist in the SIMAT 2.0 database. - THIQAH verification is done on the ID and validated to be under the UNN and identified the ID as owner/manager. If ID is not listed, then user cannot register through THIQAH method (Needs to choose Authorization letter method). - NAFATH verification is done for the user & associated messages are shown after validation. - User is shown a business registration page and can verify company details fetched from THIQAH. <table border="1"> <thead> <tr> <th>Fields</th><th>Source</th></tr> </thead> <tbody> <tr> <td>UNN</td><td>User input</td></tr> <tr> <td>Entity Name</td><td>THIQAH</td></tr> <tr> <td>Business Activity</td><td>THIQAH</td></tr> <tr> <td>Legal Form</td><td>THIQAH</td></tr> <tr> <td>UNN Registration Date</td><td>THIQAH</td></tr> <tr> <td>Number of Employees</td><td>User Input</td></tr> <tr> <td>Annual Revenue</td><td>User Input</td></tr> <tr> <td>VAT Account Number</td><td>User input (if available)</td></tr> </tbody> </table>	Fields	Source	UNN	User input	Entity Name	THIQAH	Business Activity	THIQAH	Legal Form	THIQAH	UNN Registration Date	THIQAH	Number of Employees	User Input	Annual Revenue	User Input	VAT Account Number	User input (if available)

	US14	<p>As a registered user,</p> <p>I want to reset my password from the login page,</p> <p>so that I can regain access to my account.</p>	<ul style="list-style-type: none"> - The user clicks the "Forgot Password" link on the login page. - A password reset page is displayed. - The user submits the ID number and the mobile number. - System checks if the ID and mobile number matches else a message is shown that the ID and mobile number do not match. - The user is redirected to verify the mobile number with the OTP sent to the registered mobile number. - The user is shown the page where they can create a new password. - The user successfully creates and confirms a new password. - The user can log in with the new password.
Migration	US15	<p>As a SIMAT 1.0 user,</p> <p>I want my account to be migrated to SIMAT 2.0,</p> <p>So that I can use SIMAT 2.0 and its new experience.</p>	<ul style="list-style-type: none"> - All companies are to be migrated from SIMAT 1.0 to SIMAT 2.0. - Only specific users are migrated and allocated as Authorized user to the company migrated. - These are the users registered through THIQAH and ID exists. - During migration, If there are multiple companies available for the ID number (one ID number for multiple company records in SIMAT 1.0), then the latest password and the

Classification: [Restricted](#)

		latest mobile number used in SIMAT 1.0 is migrated and validated with login.
US16	<p>As a SIMAT 1.0 user, I want to do an initial login in to SIMAT 2.0, So that I can see the new dashboard and use the new features.</p>	<ul style="list-style-type: none"> - The user navigates to SIMAT 2.0 login and enters the ID with the latest password that was used in SIMAT 1.0. - The user then receives OTP and enters the OTP to authenticate. - Completes NAFATH verification. - User is shown to add email if email is not found for the user account. - User adds email and verifies it with OTP received to the email. - If there was a registration through THIQAH done soon after migration (before a SIMAT 1.0 user tries to login), then this migration flow is not to be proceeded & all users shall be redirected to registration.
US17	<p>As a SIMAT 1.0 user, I want my existing subscription from SIMAT 1.0 to continue in SIMAT 2.0, So that I can use the services.</p>	<ul style="list-style-type: none"> - Subscription details are migrated to SIMAT 2.0 - All accounts that are inactive are assigned a 7-day free period. - Accounts with existing subscription are recorded from the SIMAT 2.0 release date. - Companies migrated even without the users migrated are to be assigned subscription resumption from the SIMAT 2.0 release date.

7. General Business Rules

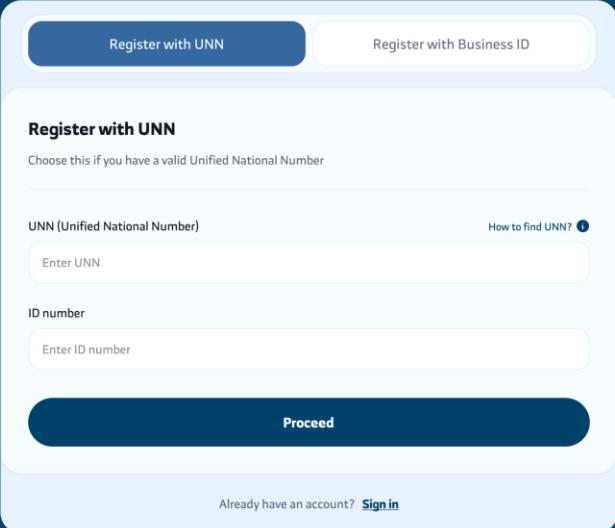

No.	Rule
BR.01	Only companies with active subscription packages will be allowed to create invited users.
BR.02	Authorized users can revoke an invited user directly without any approval process.
BR.03	Block Authorization Letter registration if the 2 free seats are already filled and company is inactive (without subscription)

8. Appendix

Appendix A:

Classification: [Restricted](#)

The image shows the SIMAT Account Registration interface. At the top, there is a logo with the word "SIMAT" in English and "سيمات" in Arabic. Below the logo, the title "SIMAT Account Registration" is displayed in bold. A sub-instruction "Create and verify your enterprise account using your official information." follows. Two registration options are presented: "Register with UNN" (selected) and "Register with Business ID". The "Register with UNN" section contains fields for "UNN (Unified National Number)" and "ID number", both with placeholder text "Enter UNN" and "Enter ID number". A "Proceed" button is at the bottom of this section. A link "How to find UNN? ⓘ" is located near the UNN field. At the bottom of the form, a link "Already have an account? [Sign in](#)" is visible.
